Location: Shegaon, Maharashtra

SUMMARY

Curious and proactive Software Engineer Intern candidate with strong fundamentals in Java and Python. Passionate about building data-driven solutions and AI-powered platforms. Experienced in backend development using Flask and JDBC, with a focus on writing clean, scalable, and maintainable code. Eager to apply problem-solving skills and contribute to impactful real-world projects.

SKILLS

- **Languages:** Java, Python, SQL, JavaScript, HTML
- **Frameworks & Libraries:** Spring Boot, Hibernate, Flask, Pandas, NumPy, Matplotlib, Django
- **Web Technologies:** Servlets, JSP
- **Databases:** MySQL, Oracle, MongoDB
- **Tools & Concepts:** Git, GitHub, Multithreading, Problem Solving

EXPERIENCE

Intern - Full Stack Java Developer *RS Softtechs, Pune* | 01/2025 - 03/2025

- Contributed to the development of scalable web applications, enhancing user experience and system performance.
- Implemented backend services with Core Java, Spring Boot, and Hibernate, facilitating efficient data handling and integration.
- Managed database connectivity and optimized MySQL queries using JDBC, improving response times and data retrieval efficiency.
- Established a used Git/GitHub for version control.
- Focused on user interface and backend integration during development cycles.

Smart India Hackathon Participant

- Achieved 4th place in college-level ranking by effectively representing the project; represented the project at the University Level.
- Contributed innovative ideas and solutions to enhance team performance and outcomes.
- Engaged with a diverse team to achieve project goals and improve services.
- Completed day-to-day duties accurately and efficiently

PROJECTS

Attendance Analytics & Face Recognition System (Team Project)

Role: Backend Developer

Tech Stack: Flask, Pandas, NumPy, Matplotlib, REST API

- Designed and implemented the backend using Flask, developing RESTful APIs to handle face recognition events, attendance marking, and user authentication.
- Built server-side data processing modules using Pandas and NumPy to calculate attendance metrics such as daily presence, attendance percentage, and trends.

- Integrated face recognition data pipeline with backend APIs to store and manage real-time attendance records in the database.
- Implemented analytics logic to generate attendance summaries and statistical insights for students and administrators.
- Used Matplotlib on the backend to dynamically generate attendance trend graphs and reports, and served them to the frontend via API endpoints.
- Ensured modular backend architecture by separating routes, services, and data processing logic for scalability and maintainability.
- Collaborated with frontend team to integrate backend APIs and deliver real-time attendance tracking and visualization features.

Online Quiz Management System *Technologies: Java (Advanced), JDBC, MySQL, Multithreading*

- Developed a robust Console Application connected to a MySQL Database.
- Designed the system to store user credentials and exam questions persistently, utilizing JDBC for connectivity and multithreading for performance.

AI-Powered Resume Filtering & Ranking System (Team Project)

Role: Backend Developer

Tech Stack: Flask, MongoDB, Python, REST API, NLP, SMTP

- Developed Flask backend with modular architecture using routes and service layers.
- Built REST APIs for job posting, resume submission, scoring, and application management.
- Implemented PipelineService to integrate resume parsing, NLP processing, and AI-based scoring.
- Integrated MongoDB for storing candidate data, scores, and job information with secure file handling.
- Implemented automated email notification system using SMTP and collaborated with frontend and AI teams for full system integration.

EDUCATION

B.E.: Information Technology *MGI-COET, Shegaon | Expected 05/2026*

- **GPA:** 62.28%

HSC: Science New English Jr. College, Jamner | 01/2022

- **GPA:** 55%

SSC New English School Jamner | 01/2020

- **GPA:** 75.60%

CERTIFICATIONS & WORKSHOPS

- **Cloud Virtual Internship**, AICTE (06/2025)
- **AI-ML Virtual Internship**, AICTE (06/2024)
- **Power BI Certification** (06/2024)
- **AI Tools Workshop, be10x** (06/2024)

ADDITIONAL INFORMATION

- **Sports:** Cricket (University Level)
- **Behavioral Skills:** Leadership (Led team during Smart India Hackathon), Collaboration, Quick Learner (Transitioned from Core Java to Enterprise Framework)
